ABSTRACT:

PROBLEM TO BE SOLVED: To provide a sheet made of a polyphenylene ether-based resin composition, excellent in flame

retardance, gauge uniformity, insulating properties, tensile strength, and extensibility, having decreased anisotropy, and further excellent in tear strength.

SOLUTION: This sheet made of the polyphenylene ether-based resin composition is formed from a resin composition which is obtained by adding (C) 0.1-30 pts.wt. of a flame retarder to 100 pts.wt. of a resin component comprising (A) 51-99.9 pts.wt. of a polyphenylene ether-based resin and (B) 0.1-49 pts.wt. of a liquid crystal polyester.
